De zwarte cijfers (vanaf 20 bar) zijn de hoeveelheid liters per minuut (L/min) wat de capaciteit weergeeft van de wateropbrengst / waterdebiet van je hogedrukreiniger / pomp.

UITLEG TABEL: 1) Bepaal eerst de werkdruk van de pomp (bar). 2) Ga daarna in de tabel met de juiste bar naar beneden. 3) Bepaal het aantal liters / per minuut wat het dichtst bij de waarde van je pomp bevindt. 4) Ga nu in de rij naar links en in de kolom "maat" kun je nu bepalen welke nozzle maat je nodig hebt. **BELANGRIJK OM VAN TE VOREN TE WETEN:** wat is mijn werkdruk en wateropbrengst van hogedrukreiniger / pomp.
